Commissioner for Patents

The drawing submitted on 3/17/04 has been approved.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This communication is an Examiner's reasons for allowance in response to application filed on 7/16/06, assigned serial 10/803472 and title "Externally activated non-negative acceleration system".
2. The following is the Examiner's statement of reasons for the indication of allowable subject matter:

After carefully reviewing the application in light of the amended claims and the additional search of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.

As per claim 1, the prior art of record does not disclose a non-negative acceleration control system for use in vehicles comprising an external transmitter and an internal non negative acceleration control, wherein external transmitted emits a positive acceleration limitation signals when the speed of a vehicle reaches zero, wherein internal non negative acceleration control receives positive acceleration limitation signals and is operatively coupled with the acceleration system in a vehicle, wherein non negative acceleration control system is not capable of causing negative acceleration in vehicle . This limitation in combination with the other elements in the claim was not shown or suggested by the prior art.

As per claim 14, the prior art of record does not disclose a method for dissipating vehicular gridlock along a stretch of roadway comprising: sending a signal to at least one vehicle of number of vehicles, at least one vehicle having reached a threshold velocity of zero and vehicle equipped with a non negative acceleration governor; signal cannot reduce the velocity of

at least one vehicle. This limitation in combination with the other elements in the claim was not shown or suggested by the prior art.

Claims 1, 3, and 9-14, are allowable over the prior art of record.

Notice to Applicant(s)

1. This notice is response to the applicant's amendment filed on 7/16/06.

According to applicant's on the remarks date 7/16/06, about comments on IDS submitted on 10/21/04, notes as items A and B, the listing of references from a search was intended only for the reason to show that a search was made for the purpose of an accelerated examination and not for the purpose of providing an information disclosure statement, which is intended to list those references most relevant to applicant's invention.

The applicant's citation of documents found in a search is an improper submission for an IDS. The information disclosure statement filed 10/21/04, page 5 of 5, fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609, because the documents listing are not in conformance with MPEP 609. Each U.S. patent document, each foreign patent document, each U.S. patent application publication, and each other prior art non patent literature documents does not list in a separate line, in an appropriate section, and column in PTO 1449.

Furthermore, the citation of over 400 pages of titles and abstract fails to identify any relevance thereof and results in a listing of superfluous documents that do not aid in the prosecution of the application. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).
